

FACULTY POSITION IN MATERIALS AT DREXEL UNIVERSITY

The Department of Materials Science & Engineering at Drexel University (www.drexel.edu/materials) is seeking applications for a tenured/tenure-track faculty position with a demonstrated record of excellence in original research in the general field of materials. Primary consideration will be given to candidates with areas of expertise in microscopy, metallurgy, and/or materials computation, although excellent candidates in all materials-related fields are encouraged to apply. Located in an exciting urban environment, our department has rapidly expanded during the past 10 years; consisting of 14 faculty, ~130 undergraduate and over ~80 graduate students working in four core research directions including nanomaterials, soft and biomaterials, electronic materials, and materials for energy and environment applications. We seek candidates who can establish a dynamic collaborative materials research program. To apply, please visit our application page at <https://careers.drexel.edu/en-us/job/492964/assistant-professorprofessor> (job no: 492964). The position is available immediately and applications should be received by January 1st, 2020, after which review will begin. Drexel University is an Equal Opportunity Employer and encourages applications from qualified women and minorities.
